

/*

Basic salary of an employee is input through the keyboard. The DA is 25% of the basic salary while the HRA is 15% of the basic salary. Provident Fund is deducted at the rate of 10% of the gross salary(BS+DA+HRA).

Program to Calculate the Net Salary.

*/

```
#include <stdio.h>
```

```
main()
```

```
{
```

```
    float basic_sal, da, hra, pf, gross_sal, net_sal;
```

```
    printf("\nEnter basic salary of the employee: Rs. ");
```

```
    scanf("%f", &basic_sal);
```

```
    da = (basic_sal * 25)/100;
```

```
    hra = (basic_sal * 15)/100;
```

```
    gross_sal = basic_sal + da + hra;
```

```
    pf = (gross_sal * 10)/100;
```

```
    net_sal = gross_sal - pf;
```

```
    printf("\n\nNet Salary: Rs. %.2f", net_sal);
```

```
    getch();
```

```
}
```
