/*** Program to Input/Output Strings using Character Functions ***/

```c
#include <stdio.h>

main()
{
    char name[20], ch = '\0';
    int i=0;

    printf("\nEnter your name: ");
    while (ch != '\r')
    {
        ch = getche();
        name[i] = ch;
        i++;
    }

    printf("\nName: ");
    for (i=0; name[i]!='\0'; i++)
        putchar(name[i]);

    getch();
}
```
